

Red Hot Chili Peppers /
John Frusciante's tone guitar patches for ZoomG2.1nu
by Hack3r89

+++++

N.B. Keep in mind that I use MXR SuperComp in every patch! It means a lot..you can use the comp efx in the pedalboard or the booster exf. Of course with a real amp, all the sounds are better. I use a cheap one and it sounds great.

Adjust the volume according to your amp. Some efx cut the signal. (ex. booster cuts overdrive signal in my setup)

My equipment (in the chain order Amp to Guitar)

Amp: Marshall MG100dfx

Pedals:

- Zoom G2.1nu
- Boss DD7 digital delay
- MXR SuperComp
- Wah cry baby
- BigMuff PI American
- Boss DS2

Guitar: Mexican Fender Stratocaster

* when not specified use the first pickup *
